

# The Procedures Course: Gothenburg 2024

**In conjunction with the Swedish Society for Emergency Medicine, we are pleased to announce our inaugural course in Sweden.**

Tailored for those seeking mastery in a range of life and limb saving procedures, this course provides a hands-on learning experience guided by specialists from the Alfred Emergency & Trauma Centre and numerous other trauma centres from across Australia, Europe and the UK. This year we are excited to once again offer a course in Vienna, Austria.

Join us to immerse yourself in an enhanced educational experience, featuring un-embalmed cadavers and an optimal cadaver-to-participant ratio, ensuring a focused and confidence-boosting training environment.

Given the course's high demand and limited availability, we encourage you to register now and secure your place.

## **Procedures will include:**

- Surgical airway (cricothyroidotomy)
- Orbital decompression (lateral canthotomy and cantholysis)
- Pleural decompression (finger thoracostomy and pleural drainage)
- Vascular access (MAC line / RIC line / Intraosseous access)
- Temporary trans-venous cardiac pacing
- Pericardial decompression (including resuscitative thoracotomy)
- Retrieval limb amputation
- Escharotomy
- Resuscitative hysterotomy

## **WHERE:**

KAT, Department of Biomedicine  
Göteborg University

## **WHEN:**

8 & 9 October 2024  
0800 - 1600
